## Yakuza 3 ps3 trophy guide

Hey guys, just thought I'd note here for those who are interested that Y3 is remastered is available compared to 5 additional bronze trophies on Yakoza 3 PS3, all of them actually related to the supplementary activities that were cut off from the western release of the game. Some other trophies have changed their needs too. It seems like a spectacular breakdown of differences, by the PSN Profiles Forum on The Wartcaller: change is that all story-related trophies are now more clipnatic names, rather than just defeat [boss character] more and more. It also apply to Platinum, which is now called the world's greatest father instead of just the Platinum Trophy. Oh, and the skilled hotar has been converted into good hotar. Minimum number of pletharvoges: Play #1 2 steps-hard. It's usually not too hard and it will give you the former hard mode to inlock. During this first play you can either do all/majority of substories/managamas or you can wait until you beat the game to get into premium story mode. Step #2-After you beat the game it is a clear data secure which allows you to continue from where you left off in premium story mode and provides you to clear all 101 substories, all 16 manigami challenges, and which tournament to finish. Go into premium story mode and finish the rest of the substories and mini games. This will be the biggest time to participate in the game, so let's see that some of the mini-games can be really difficult to complete. \* If you start a premium new game using clear data then everything except your items, devices, and surfaces will be anointed. Many games, substories, and all other items on the completed menu will return to 0. Stage #3-hit game on the former tough. [PS3T want to thank Yadali for this road] See Substory CompleteOnast View Substory CompleteOnast Substory Completeonast Substories Around Ryuku and Camorocho Go. You will be pure ten, Maybe 50 missions easily. However, the rest will take some of the gags. As you know, some substories are cut from the North American version. Also, some of these substories are massabali (Google it). I'm sure you know that Massabali means no trophy, so here are the massabali substories.... \* Very minor suppliers \* Chapter 4: A trip before marriage: it was an actually cut off from the game, so it took some time and forget about it. Chapter 4: Love Letter in a Bottle: When you get a chance at Chapter 4, then head the beach in front of the Sansin orphanage. You'll see what the fishing rod looks like like a close-to-the-sachil need. Pick up the bottle and the quest stars. Piece of cake. Edit: Okay, so obviously it appears again in Chapter 10. If you've remembered it in Chapter 4, keep eyes out. Chapter 6: Dotting the Eye: What should the eye do after reaching Camoroco with Dotting after a few activities with Raamaya, he will mention the end of his wiper tattoo. To begin with, head of the Alhi Dragon Tattoo Saler in Pink Allied. Chapter 6: Gift from home back: It starts when a second time are with Raamaya, after arriving in Camorocho. At one point, you'll leave it in the new Serena and finally go out with it. Towards Anotati, Head of Asia, SLR. Chapter 12: Couples who will not learn: This mission has also been cut off from the NA version. Don't forget to do these stories. If not, you'll kill you later. As for the rest of the stories, there are many of them, boring works. Every time you come across a unique substory, like the film or work in a batting challenge, but most of the time they consist of fighting a set of enemies. Keep in mind that some substories are only enabled when you work with its lines several times or something. For example, if you score 1200 points in score cages, you'll find a new substory. I know that such a mission is cruel to them to hide, but what is the whena, uh? Check Onisoka's substory list with this chapter 5 or 6, you'll see the ABUQ of THE HLA. He will bring you back to his headquarters and again, you will have access to the Hetmanist Mission. When you make progress through them, the hetamanist mission increases, but also is more profitable. Hell, first mission begins at 70,000 prizes. Open all the lockpers in the top row in both Camoroco and Downtown Ryuku Islands. Well, this bad boy can be a pain. You just need to open the top row of each set of lockrs [1-10], but it seems that single number-lockkeys are the hardest to find. You should not have much trouble finding keys in Ryuku. Make sure you check in every street and every shop. When you do that, two or three come back to the sun. When it is done, go back down to the city and use to look in trees, awnings above, etc. Your cat but is insimilable. That's where it's Gets it. When you get camorocho, then repeat and kalla. This city has been big since it should be difficult. As for 1-10 keys, they are as follows.... \* Use the first-person camera in place of all credit reukioni: on a white/green striped awning in the southwest side of The Karyusha St and market. Two: Inside The Aqwa SkyTHREE: Four of the Weapons Inside: On the second floor of the market within the arcade. Once you reach the top of the stairs, the fluorescent light bulbs are visible. Five: The Reuku Trust Bank and the Beaduk shop across the Wahaed Rath station. Look in the tree in front. Six: Directly to the west of Wahaed Path station is a river. Probe a pillars to find the key. Seven: Above the wooden fence on the south side of the road in front of Sanshen and Pahanayaghat: Inside The Ryuku Night: Walking away from Ryuku on the west in the street, between, The Gammorrah, two level trees. Ten: Smile on a chairs inside Bergrakamochroni: In the middle of the way, to run east from the club on stage Naqacha St at the street door on the right, on a wall above the left, no signs regardless.... Three: On the ground in the middle of the road, east of Tai ast, near the entrance of The Carai (Korean Nodles) Four: Park 3 to street across the vacant space, finally on the wall, two level trees on a tree northwest of the plaza on the south side of the Malananiyuum Tower, on a tree northwest of the plaza on the south side of the Malananiyuum Tower: behind New Serena, on the top of the brick wall near the blue-wending machines. Inside club Thetersiagaghat in front square in the square: Inside on the floor M. E. B. Nine: On the pipe on the north wall by the parking lot on The Shachafuko, by No. 7 Parking Space Ten: Running from the pink road to the west by the ground on south street, near the alhedragon tattoo edifer. Order the most expensive items in all restaurants. It will be difficult if you don't have track of your purchase. Track each restaurant and bar using the label on your map, both in Tokyo and Ryuku. The most expensive items are not too expensive, so don't worry about money. If you choose to order a meal after a drink, buy the most expensive of everyone. Also, if there are two items of the same price in a store, then buy both. A good strategy I used was to take the insect around. Fill your inventory with them and make you way from one restaurant to another. When you are complete, you may lose some health by eating the worm. This way you will not be changed because you are not hungry. Note: You should go with a copy of the magazine inside Tokyo for their most expensive items in the following stores. -Smile-The-Brush Er- Camachu- Gatera-Sashi-Kaintra-Kyushi No. 1 Stars plus a day menu and a night menu that notes. When you reach Chapter 12, you can access any time. So if you're trying to get this before Chapter 12, you've gotta stop Pronto during the day and night. End 50 battles with the actions of heat. Fair For people who don't know, there is a heat action when you are shining funny colors and the blows go boom in slow speed! In other words, when you get your heat gage quite high, you can be able to perform special techniques to get the nail done. I started it from the beginning, at this point you don't have many heat actions. I felt easy to take the last man in a quarrel, take him near this lamhadid and a wall or bike rec and hit. Keep in mind, a heat action game will kill any non-boss character through most of the game. All claim victory in which tournament. It's time to take. You're going to have a lot of fighting in many of the match. Tag match included. Just keep fighting and as you progress, the new tournament will emerge for you to po. You must beat 3 times each tournament to lock up next. Also bomber SP who just needs a victory. It's very easy. For those who have difficulty finding all the tag match partners, here's some help...-Maxim Suladadavo: You'll find it out in front of whom it's in front of it after you beat it. Bruce Abnna: Talk to two people in the land angel, once champion's district, and back. Bruce will reach and you can talk to him. You'll win 50 battles on the streets and defeat bruce.-Daaja Haamaayama: After defeating Daaja, and breaking 50 weapons in road battles, you'll find him in a smile-bridger.-Keigo Janno: You'll find two guys in The Mac Bowling. Talk to them, fight Keigo and they'll be waiting for the next time you come in. Talk to him again and he's appointed.----- Everest: You must play five full rounds in the batting cages. They'll stay there when you do that. This is until the Pro Baseball Player is there (they will reach if you get 1200pts in the hard cage). As you progress, more new opponents beat, and win tournaments, point exchange will get more new, cool items for you to change points. All the weapons and items that you are searching/collecting will finally come to use. The weapons store in Reukeya (no van) (next to the Reudo family/offices) finally allows you to do something with this strange mess that you could not find used to. If you can know how to put new weapons together with the material, you find out. Note: You don't have to take specific items to create a moded weapon. For example: If you want to make a glass shooter (TM, me) and you need a shot gun, a piece of horse dirt, and a clothes-henter, you don't need to be equipped with these items. When creating a moded weapon, you can access your secret inventory. Keep in mind. Your first revelation. You'll walk in the Mac, revelation man. I right before leaving for Camorocho. He'll contact you and you'll make some crazy old lady movie on a spotter with your phone. The goal is to take three pictures, use quick time events Turned up, and one of them chooses to learn a new trick. Your trophy will come with this first, practically immassabi, revelation, so don't. However, After that, you'll receive emails from Mac notifying you about new verses scattered around the city. You will find an email with a hint and a location. Find this person, go in. This will start a cut view. Take your photos and then finally choose the right picture. It may be confused, but if you mess up, don't worry. Just go to a store, come back, and that beuoff/crazy person is ready to go again. Press the mode and face all the master. There are three master yonnasto, Komaki and everyone's favorite black Japanese, Mac.-Yonsanco, will face you through the story, before you go to Tokyo. They will have three things to you to be able to eat, nunchaco, tonfu and kalli lath. If you don't know what you're/doing, it can be difficult.-Komaci is available after completing a mission for some bums in Tokyo. You will get a letter from it once you complete the Mission Reugoa Restore. This mission can be found behind the Malayanium Tower. Komaci will give you all the education of their secret techniques. They're all very helpful, so he's a master you want to complete.-Mac is an allot trainer in your pain. You will not actually class\* until chapter 5. Chapter five, in Tokyo, you can find it by Purgatory on the Park Blade. He will tell you that he has some perspective in the place that is in Purgatory (you will know what Purgatorey is the key quest). Go to Purgatorey and they will have some driving technique to help you to eat. It's the one you face with it.-Internal Fighter 7is Arcade-Aissi game which can make you to make new gem moves. You will find IF7 in the southeast of the Champion District. In a small street, you'll see a doctor looking brown science. Talk with him and you will have a clash. Get a hat trick in darts. I found it to be one of the easiest mini-game specific n-rupes. I'm sure some others will look into the eyes with me, and some others will not. For those people, this is what I found successful... The hand of the kazoom is the key, his hands are raised so that his index finger and thumb are just a bit above the books. Keep in mind that you don't have to get three in black. They will just have to be in black or red. More likely to hit. Just a little bit, back up with your fingers on top of the boles, and move on, you pulled back into the movement faster than. Not too fast. Throwing can be difficult. You'll just get his hang. Remember, you don't want to back all the way back and you don't want to push all this way forward. Get a break in the no ball pool. When you are breaking into the pool you have to get nine balls in the hole to collect the break. For those who don't know how to break, this is the first shot in the game. All balls are with each other in the form of a diamond and someone shoot the white ball into them, that is breaking. The goal is to get nine hairs in a socket while you break. Well, I just got this trophy and what I've done... During the break, I hit the ball Well then it's attached to the purple ball, the second one in the diamond (right of the ball in front). Then I shot my shot up with this purple ball and shot with full power. I got three balls, including 9 balls. If there are any other suggestions, please share them. Sing all the song in the cravky. It's a piece of cake. Throughout the game, on several smile-over-the-brush, you'll find dates. Take these ladies out and choose the karavka. It is a good way to kill two birds with a stone. Although on dates you can't choose which songs, songs, they will not always be the same (unless you take the same girl out twice). Once you're dating, head to a sit-alone location and you can complete others. Only 6 songs, songs and games is not much of a challenge. It's a easy bronze. Get turkey while bowling. It can be very difficult. I'm sure we've all got a turkey or two in The Wei Games or Gat IV, but Yakoza is not that easy. I recommend you take a few steps to the right and left when you throw the ball. Let's use this as an example. Take a few steps to the right and shoot you so when you throw it, it will hit the pin and go left for a while. At the right angle, you can hit the covers of the pinons and get a strike to you. You want to aim towards the first and third pin. Three attacks in a row are turkey equal. Make sure you choose to do this 10 when playing the game. The points in Ki-lo, Cho-han, No-No-One and Okho-Kabu get a combined total of 10,000. The game you're going to play here, is cho-han. Cho-Han is the condition of being able to start with you 200 tags and selects you odd or even more. After a certain amount of earning, you will be able to figure out that one of the two nandis will be read. I always recommend to select 1. It seems to come more than any other number. After winning a few more, you'll be able to guess both the nand, betting against the house and betting up to 1,000 tags. I stick with a dying batting and choose 1, with a bet of 300 tags. If you win, you can challenge the house. Based on your win and whether you feel comfortable enough, challenge the house and choose odd or even. You'll double your win. Perhaps this is the easiest way to get a trophy. Get a combined total of 10,000 points in Poker, Rolynty and Blackjack. It's easy to get one. buy 1000 chips (100000 yin) and bet were red on 500 and black on 500 routes you will always get 1000 chips back and you will get the trophy at any time. Buy a gold plate with chips to get back 100k and sell it to twenty isu bead -credit to the ma'am. Full Ployr conditions for the game in arcade. Get 10 full animals in the sound catch, and get a high score in shooting games. The mini game master looks like a little girl to this trophy. This is a mini The master will give you much less grief than you do. Catching sound can be either easy or difficult. I believe that the machine currently relies on animals. Big doll, come this You. Living with small people. Small Ployr chans (but), are easy targets. Once you knock them on their face, at the right angle, they should not be a problem at all. Kura-Chan, mobile phones girl doll, also pick up easy, as are beary bear. I had trouble with these people. Try and find a sound catch with some diversity. If you don't like the choice or if you mess up all the dolls, see an employee and they'll put new dolls. As a botheluis, it takes some practice, but can definitely be mastered. My first version is to hold it instead of taping on it. It will release fast, non-stop fires. You will not get high score unless you kill the majority of the ship from their sweet spot. To do that, but a little bit above the plane to him. When that ship grows, you will kill it automatically by hitting its sweet spot. Don't be disappointed with this game. Patience is the key. Hit 2 panels with a ball in a tough game on the batting cage. I found it to be easy. Since I achieved this trophy, I've been beating two panels at a time, non-stop. The key is cursorsnaver. You want to straighten the cursorswhair with the panel's well-off. What I found easiest was to put the hair on the 2, 3, 5 and 6 at the tops. This way you will get the chance to hit 2 and 3, 3 and 6, 2 and 5, or 5 and 6. This enhances your chances. Make sure you don't switch too soon. It should be just right. Hit a 350 yard drive in competition mode in golf. I got it without a try. During Chapter 4, I believe it is, you meet with an imported political figure in Ryuku. This is part of the main story and it's the first time you go to the golf course. The key is to just get the strong shot. Hit the top of each meter bar and right on the mark for full power. You're going to want to do that on the first hole, because I think it's the longest. You can try your shot again several times as you want, so you can progress to the match when you finally get it. You want to get crabs for bait. Empty your inventory and kill the public market city and fill it on crabs. Others will be able to make it work, but there is no risk of wasting time, unless you want to. So fill up on crabs, return home and save. Go to the fishing pole and start fishing. You want to keep trying until you see the fish around the 120-150 zone on the map. This is where you will find the tony. Note: Don't forget to stop you and take waste garbage on the beach at all times to start fishing. It's a tribulation. This includes the prafixiang and every mini game has to be offered to Yakoza. It is probably the most time to use the trophy in the game, next to the next Communist story. For help and suggestions on this trophy, go to this topic here. Play all round in ultimate skill mode after the game is beating. The ultimate skill mode is a game type that is open when you beat the game. There are several categories and each ten rounds that are more difficult than one Goes. Custom Custom ie: Defeat 3 men without losing heat, race around Tokyo, etc. can get away in game types like a skilled jodha to The Mei, but they will definitely challenge you later. Complete every round of every type to get this trophy. Beat the game on extra hard. It's self-defining. Complete the key quest again on extra difficult ya. You must complete the strict mode to lock extra hard. So if you usually pay around your first time, you're going to play again twice. It's an easy one. Don't take taxis, just walk everywhere. There's no time you'll find, so don't get on it. Some people are saying that they get it later than 42, 195km, so don't panic if it does not come correctly. Plus 10,000,000 yin. 10,000,000 yin is a lot of money. You must have it all at the same time. I recommend to make such many missions and random encounters possible. The belief in achieving randomises get upset and you just want to run from them, but some people may try thirty to 50,000 yin. Most important of all, complete all The Action Mission. They pay a few more and more and they become harder, they become more profitable. Which is not the best place to find cash, however, when you have finished it completely, the money is added. Also, find a casino game which you are good and win away. There are items that help you win in some games, such as lookcigarettes. Using these items helps a lot with the jaa. At the end of the game, you'll get 2,000,000 yin. It's a good promotion. Just keep the truck carrier along and don't spend and you'll get this trophy. Earn all the other trophies in the game. It's going to take you a long time, but if you dedulate ye to ye you will finally get it. It should be very beneficial platinum, because it includes a lot of grinding. Keep your head and you'll find it at some time. Defeat Majam About Chapter 1Story, Can't Remember It. Defeat Ramaya Chapter 2Story, can't miss it. You can't miss the Beat The Index, related to Chapter 3Story. Defeat Ishesarat. I can't remember the story in chapter 4. The defeat of the mysterious alien in Chapter 5 is related to The Brownstory, i.e. can't remember it. Defeat Kaanda Chapter 6 related to story, can't miss it. Defeat the majam related to this chapter 7Story, can't miss it. Long in chapter 8 of defeating lebanese American University, it cannot be remembered. Beat The Fam, related to chapter 10 story, can't miss it. My chapter 12Story related to the story of defeat, can't miss it. Related to the story, you can't miss it. You will get this trophy when you complete the game. It's basically thanks to you that you made the trophy to buy and complete the game from your staff. It's an easy one. I made a detailed theme with enough tips on it. Visit: Here's basically what you want to do, over 100 citizens Or to walk in the streets of Camorocho. The best way to go about the subject link is to follow these steps:search and get the old/honked them back to straighten their shoulder as well Run on them like an ice-plantf let's try something to use it for, but once you get its execution, it's the fastest and easiest way. It works on all citizens, but I find more and more honnkad from senior speople. First person modeAn easy to start 10 fights using one. While walking around the city between missions, review your surroundings. If there's a man moving forward, then standing, he's most likely going to come after you. From a distance, hit on it and focus on it. He'll go crazy and come after you. Proceed to put the sumecitta down on his ass and you're golden. Repeat 9 more times and you're bronze. The Baatalinotra easy picked up in the secret trophy to break 100 weapons. Using weapons you don't count to be brought into battle. You must use them from the city or weapons dropped by the enemy. Break their 100 and the trophy is yours. Don't go out of your way to get it, if you use weapons it will be time. Master Anunomantast Sanshin Biavi. The easiest way to suck and suck 30 up on the waste for a pick-up is to use the fishing rod. Go to the beach, click the stick and you want to fish. When it asks you if you want to fish or leave, leave and the beach will be refreshed. Repeat the kalla and 29 more times. As a list of the following is...empty wood box-empty-empty soda-snare (cane)-whatboais is that material is not considered to be looking at the reed... I know, bs, okay? Right?
