Offline rpg android reddit

anyone can help me share the offline rpg Android game? as for now I just found a lot of gacha type online game. Page 2 17 comments I currently play Pokémon go and Monster Hunter Stories as my main online mobile games. But I'd love to have a game that will run offline. One that has RPG-type elements is likely to be most preferred. Not a big fan of puzzle games, but I do like action games as well. Page 2 Comments commentsPage 2 Comments I always find these cool looking RPG games like knights chronicling, honkai impact, Shin megami liberation, but they always need you to be online 24/7 to play. I don't have a phone internet plan because I just don't use my phone much, but I have times when Im waiting at a bus or whatever id like something to do on my phone. I don't mind paying a little if it's a good game like 3DS rpg quality (Fire emblem, Etrian odyssey, Shin megami etc). Anyone know if these mythical offline rpgs exist on mobile? Page 2 12 comments Comments Title says pretty much everything. I love rpgs and an offline game on my device would be a good time killer. Page 2 Comments I went looking for some good offline RPG type mobile games to play at work where there is no signal. I like Pokemon type games and gacha games like Fire Emblem heroes and Monster Super League, but those tend to be online just from what I've seen. I played Ethernium but got a little bored of it. Also can enjoy action games with RPG elements as long as they are available offline. Any suggestions appreciate thank you. Page 2 34 comments Hi I'm looking for offline rpgs with great

game2d pixel art or 3d with endless hours of game friendly a like route like games. Page 2 95 comments Travel and don't often have data. Is playing Archer and Hero Park that work offline and require occasional synchronization. Any suggestions?
